## **Piper join Calver to produce 'Calver Profile' cam range for classic Mini**

The distinct lack of development on A-Series camshafts over the past couple of decades may well give the impression that it's all been done, but nothing could be further from the truth as the latest releases from Piper Cams prove...

Piper Cams have joined forces with Mini gurus Keith Calver and Graham Russell to develop a new range of profiles which have shown themselves to be far superior to the established benchmark performance cams.

The cams have been extensively tested both on the track in actual racing and independently on the dyno. The results show that these profiles develop considerably more torque over a greater rpm range than the established performance cams on the market.

The cams are available in various Fast Road, Race and Rally profiles with prices starting at £68.05 for the cams alone (full kits also available) and are only available direct from Calver ST.

**For more details or to purchase on-line visit the Calver ST website at**
