Piper Lightweight Vernier Pulleys for Vauxhall/Opel 2.0L 16v C20XE Engines.

Piper Cams have just released a new lightweight vernier pulley set for Vauxhall/Opel 2.0 16v "Red Top" Engines as used in the Astra Mk2, Cavalier, Calibra, and many Nova/Corsa Transplants.

These light dural pulleys allow for simple, quick cam timing adjustment. The graded scale etched into the pulleys allows you to advance or retard cam timing to one tenth of a degree to alter the torque/power characteristics of the engine precisely by increments.

The pulleys shown are finished in Piper's popular anodised red, but they are also available in blue or black. These latest generation Piper pulleys feature hard anodised rims and have already enjoyed success on WRC rally cars.

The Piper Lightweight pulley set is ideal for use with Piper extra high lift cams.

A pair of these Vernier Cam Pulleys retails at **£200.92** Inc VAT

For more details contact Piper on +44 1233 500 200 or visit their website at www.pipercams.co.uk
